## **August 9<sup>th</sup> 7pm 2017**

- I hope all the board members could look over the updated rules and regulations for the water system. This information has been available for the last 3 months. Can the board approve them so I can move on to my next issue I want to work on.
- There are 310 meters in service.
- There was no new water hook ups this month.
- We have been doing dead end fire hydrant flushing. This has been going good and will be on going threw out the summer into fall until we do our fall flushing.
- Regular upkeep and maintenance was performed.
- I have been in constant contact with Badger Meter on the meter read update. I hope to have it up and running with in the next couple months.
- We did a round of required water testing in the month of July. We did Nitrate and Nitrite. They cam back good. We are still waiting on part 5 table 8B inorganic primary and 8D inorganic secondary, and we also did table 9C synthetic organic.
- Eye wash and Fire Hydrant checks have been done.
- We did our monthly water sample required by the D.O.H. MET the bacteriological requirements for a public water supply as set forth in subpart 5-1.5 of the State Sanitary Code under Public Heath Law 225.

Thank You,

**Eric Rogers**

Class C Water Plant Operator

- \* I will be out from Sept 8<sup>th</sup> 4-6 weeks for personal medical issues. Once I can get cleared to do lite duty I would like to do what I can until I can get full clearance.
- \* I want to start our fire hydrant flushing the week of Columbus Day. I would like to work Columbus Day and take it off at a different day so the flush might not effect the school as much. As of right now fall flushing is planned for October 9<sup>th</sup> - 12<sup>th</sup> Please post that date in the paper.
