July 12th 7pm 2017

- I hope all the board members could look over the updated rules and regulations for the water system. I would like for the updated version to be approved at next months meeting.
- There are 311 meters in service.
- There was one new hook up - and one that was disconnected a couple years ago got turned back on.
- The water office computer went down and we had to replace it with a new one. I am now trying to restore needed files.
- Regular upkeep and maintenance was performed.
- We will be starting our summer dead end fire hydrant flushing soon. This helps to keep the water moving in low water used spots.
- Eye wash and Fire Hydrant checks have been done.
- We did our monthly water sample required by the D.O.H. MET the bacteriological requirements for a public water supply as set forth in subpart 5-1.5 of the State Sanitary Code under Public Health Law 225.
- June's Ir & Mn test results will decide what well I will have pulled – cleaned and replaced this year so we can keep up on our 3 year plan for well cleaning and maintenance so we will not have to have all 3 wells done in one year. We did well #3 last year.
- I was able to talk to a person from Badger Meter. We had a meeting with her and got some better numbers and could see what we would be able to do with some new meter reading software. (Seth has info on it)
- I was able to meet up with Seth about reviewing EDU's – Rules and Regulations and Badger Meter stuff. We are working on updating and doing some small modifications and will have more info in the upcoming months.
-

Thank You,

Eric Rogers

Class C Water Plant Operator
