November - 2023

- There are 318 meters in service. I have looked over the meters in service some more and still looking over information to make sure it is the correct number. I have changed a couple meter heads. We are looking into a more cost affective way to read meters and fix the “no or miss” reads. To fix some no reads I’m looking into cell units?
- I had no new water hook ups for the month
- Regular upkeep and maintenance was performed.
- Had a hand full of dig safe mark outs.
- Eye wash and Fire Extinguishers checks have been done. Yearly inspection was done.
- We did our monthly water sample required by the D.O.H. MET the bacteriological requirements for a public water supply as set forth in subpart 5-1.5 of the State Sanitary Code under Public Heath Law 225.
- All hydrants have been winterized and ready for the cold months.
- Hoping to get numbers back on it sometime soon to put into the records from the hydrant test at HHHN site.
- Fall fire hydrant flushing went good. We flushed all the hydrants and did dead ends a 2nd time.

***** If a fire hydrant is used PLEASE contact the water department so it can be re-winterized. *****

***** If we get snow it is greatly appreciated when town resident clean around the hydrant near there property so it is easy to access in case of an emergency*****

Thank You,

Eric Rogers

Class C Water Plant Operator
