October 2023

- There are 318 meters in service. I have looked over the meters in service some more and still looking over information to make sure it is the correct number. I have changed a couple meter heads. We are looking into a more cost affective way to read meters and fix the “no or miss” reads. To fix some no reads I’m looking into cell units?
- I had no new water hook ups for the month - had one disconnected on Rt30 where a house is going to be removed.
- Regular upkeep and maintenance was performed.
- Had a hand full of dig safe mark outs.
- Eye wash and Fire Extinguishers checks have been done.
- We did our monthly water sample required by the D.O.H. MET the bacteriological requirements for a public water supply as set forth in subpart 5-1.5 of the State Sanitary Code under Public Heath Law 225.
- We got our 3rd Quarter Iron / Manganese sample results back. Everything was within DOH numbers
- We did fire hydrant flow tests on hydrant #69 location. This is where the HHHN building is going to go. Hope to get numbers back on it sometime soon to put into the records.
- Fall fire Hydrant flushing happen the week of Columbus. The flushing went good.

Thank You,+

Eric Rogers

Class C Water Plant Operator
